This is a level 1 header

R Markdown

This is a level 3 header

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

here is a link to google GOOGLE

Here is word in **bold** and another world in **bold**.

Here is a word in *italics* and another word in *italics*.

When we compile our document, we are using the `rmarkdown` package.

Here is an example of a non-numbered list:

- Breakfast:
  - food
    * eggs
    * toast
    * bacon
  - drink
    * apple juice
- Lunch
  - taco *Dinner
  - baked chicken
  - brocoli
  - rice

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:
```
summary(cars)
```

```
##      speed           dist
##  Min.   : 4.0   Min.   :  2.00
##  1st Qu.:12.0   1st Qu.: 26.00
```

```
##   Median :15.0    Median : 36.00
##   Mean   :15.4    Mean   : 42.98
##   3rd Qu.:19.0    3rd Qu.: 56.00
##   Max.   :25.0    Max.   :120.00
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
